

Action plan submitted by Ferah Akar for Yıldırım İlkokulu - 26.12.2022 @ 19:03:03

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.
- › It is good practice that your ICT services are regularly reviewed, updated and removed if no longer in use.

Pupil and staff access to technology

- › All staff and pupils are allowed to use USB memory sticks in your school. This is good practice, and your Acceptable Use Policy should stipulate that all removable media is checked before use in the school systems. Check the fact sheet on Use of removable devices at www.esafetylabel.eu/group/community/use-of-removable-devices to make sure you cover all security aspects.
- › It is great that in your school laptops/tablets are easily accessible within a lesson. Using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.
- › Since staff and pupils can use their own equipment on your school network, it is important to make sure that the Acceptable Use Policy is reviewed regularly by all members of the school and adapted as necessary. It must be discussed with pupils at the start of each academic year so that they understand what is in place to protect them and their privacy, and why. Base the policy around behaviour rather than technology. Visitors must also read and sign the Acceptable Use Policy before they use the school's network.
- › You should organise a meeting with other teachers so you can discuss how the school could use social media and digital devices as an aid to learning in the classroom. Look at the outcomes and report from the SMILE project (Social Media in Learning and Education, <http://www.eun.org/teaching/smile>) to learn more about using social media in the classroom.

Data protection

- › Your new users are given a standard password and are asked to generate their own password on their first access. Passwords offer unique entry points into the school computing system and some basic rules of

password security should be rigorously applied. For further information, read the fact sheet on Safe passwords at www.esafetylabel.eu/group/community/safe-passwords.

Include these rules in your Acceptable User Agreement and avoid giving new users a standard "first access" password.

Software licensing

- › Compliance with licensing agreements is important. Someone needs to have overall responsibility to ensure that this is happening and that all licenses are valid for purpose. Staff should be briefed on who is the person responsible.

The [End-user license agreement](#) section in Wikipedia will provide useful information for understanding terms and conditions and comparing software agreements.

- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.

IT Management

- › There is a mechanism set up in your school that allows any staff member to make a request for new hardware/software - a request that leads to an informed decision within a reasonable amount of time. This is great as this way teacher can benefit from new technologies while still staying inline with school policy.

Policy

Acceptable Use Policy (AUP)

- › It is good practise that in your school teachers and pupils sign the relevant school policies and that it is discussed with pupils beforehand. Consider having regular meetings to discuss them and where non-conformity is dealt with.
- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at www.esafetylabel.eu/group/community/acceptable-use-policy-aup.

Reporting and Incident-Handling

- › It is good practice to log cyberbullying incidents that occur in your school centrally, as you are contributing to building a data base of successful incident handling practices from schools across Europe that you and others can use in future. Make sure that pupils sign up to anti-bullying guidelines in your Acceptable Use Policy.
- › Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline (www.inhope.org).

- › It's good that you have a clear School Policy on handling out-of-school eSafety incidents; is the number of these declining? Start a discussion thread in the community on what other preventative measures or awareness raising activities could be used in order to reduce the number of issues further. Don't forget to anonymously document incidents on the Incident handling form (www.esafetymodel.eu/group/teacher/incident-handling), as this enables schools to share and learn from each other's strategies.

Staff policy

- › It is good practice that the school policy includes information about risks with potentially non-secured devices, such as smartphones and that reference is made to it. Consider sharing your school policy via the uploading evidence tool, also accessible through the [My school area](#).
- › As new technology and online practices emerge the borders of acceptable practice are constantly blurred. This is something that needs to be discussed at staff meetings often. Could you create a tutorial on professional online conduct of staff and upload it to your school profile via your [My school area](#) so that other schools can benefit from your good practice?
- › In your school user accounts are managed in a timely manner. This is important as it decreases the risk of misuse.

Pupil practice/behaviour School presence online

- › Check the fact sheet on Taking and publishing photos and videos at school (www.esafetymodel.eu/group/community/taking-and-publishing-photos-and-videos-at-school) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.
- › We recommend that you specifically nominate a web-experienced staff member to periodically check the school's online reputation. Monitoring such an important aspect on an ad hoc basis only is insufficient. Remember that this is the image that prospective parents will receive when they search for your school online.

Practice

Management of eSafety

- › Technology develops rapidly. It is good practice that the member of staff responsible for ICT is regularly sent to trainings and/or conferences to be aware of new features and risks. Check out the [Better Internet for Kids portal](#) to stay up to date with the latest trends in the online world.
- › Ensure that the governor or board member appointed for eSafety has the opportunity to receive regular training and also to ensure that colleagues are aware of eSafety issues. Involve your governing body in the development and regular review of your School Policy. See our fact sheet on School Policy www.esafetymodel.eu/group/community/school-policy.

eSafety in the curriculum

- › It is excellent that consequences of online actions are discussed with pupils in all grades. Terms and conditions

need to be read to fully understand contractual conditions. This can also concern aspects of data privacy. Another important topic is breach of copyright. Please share the materials used through the uploading evidence tool, accessible also via the [My school area](#).

- › It is good that these issues have been included in the eSafety curriculum. It is a good idea to regularly review the issues which are being covered by your eSafety education in order to ensure that new and emerging issues are covered.
- › Sexting is an issue which affects many young people. Sharing possible consequences and risks with them is important, as is the opportunity for some discussion around the issue. Sexting should be part of a broad and balanced eSafety curriculum.

Extra curricular activities

- › It is good to know that you are frequently using the online eSafety resources from your national Safer Internet Centre. Have you found these resources helpful in your school? Please send your feedback on their use and value to info-insafe@eun.org.

Sources of support

- › Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at www.esafetylevel.eu/group/community/information-for-parents to find resources that could be circulated to parents and ideas for parent evenings.
- › It is good to know that other school services are involved in eSafety issues (e.g. counsellors, psychologists, school nurse). Are they also invited to contribute to developing and regular review of your School Policy? Publish a case study about how this is managed in your school on your school profile page on the eSafety Label project website, so that others can learn from your experience.
- › It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.
- › It is great that you have a staff member which is knowledgeable in eSafety issues who acts as a teacher of confidence to pupils.

Staff training

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
